

HOW TO APPLY WALL DECALS

Whether this is your first time applying wall decals or you've done it before, **application is meant to be simple**. Always remember, just peel and stick! Your wall sticker sheets may also include numbers (depending on the complexity of the design) next to each cut out wall decal to help guide you to build your decal and know which sticker to place on the wall first, second, third and so on. Follow our guide below as we walk you through the steps of how to apply wall decals.

A STEP BY STEP GUIDE ON HOW TO APPLY WALL DECALS

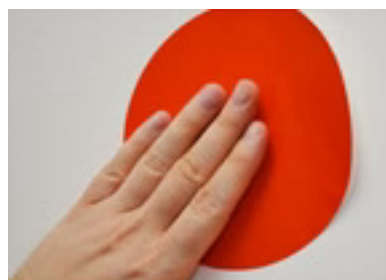

STEP 1

Your RoomMates wall decals will arrive printed on one or more sheets and packaged in a protective plastic shell. Open the packaging and remove the sheets. Spread them out on a flat surface near your desired location of application.

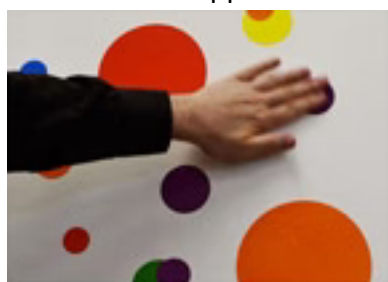

STEP 2

Peel the first decal from the sheet. It should remove easily from the liner. If handling a large design, consider recruiting a second person to hold the opposite end of your decal so that the two sides do not stick together.

STEP 3

Bring the decal to the wall. Slowly smooth the design from top to bottom, pressing down firmly. Ensure that the entire decal makes contact with the wall or surface, and that no air bubbles are trapped beneath the sticker.

STEP 4

Examine the placement of your wall decal. If the applied element needs to be moved, simply peel it away from the wall and re-apply. The decal will remove and re-apply easily regardless of how many times this process is repeated

STEP 5

Repeat steps 2-4 until you have applied all included wall decals, or (if you are assembling a large design from multiple pieces) completed the application of your giant wall decal.

STEP 6

If you need to move your decals, simply peel them away from the wall and place them back on their liners (or wax paper). Roll up the sheets and store them somewhere safe until they are needed again.

WALL DECAL APPLICATION QUESTIONS

HOW DO I APPLY YOUR WALL DECALS?

Most RoomMates wall decals are as easy as peel & stick. That's it! Just peel them from the liner and stick them on your wall or surface of choice.

I AM HAVING TROUBLE HANGING MY GIANT WALL DECALS. CAN YOU HELP?

Yes! Our giant wall decals are applied very similar to our wall decals. Since our giant wall decals are much larger, we recommend sticking your decal to the top of the wall and working your wall down.

AFTER I APPLY WALL DECALS, WILL I BE ABLE TO REMOVE THEM?

Yes! After your wall decal has been applied to the wall, you can remove, reposition, reusable, and add to a completely other wall. The best part is, no sticky residue will be left behind on the wall and the quality of the wall decal will stay just as strong! Transfer wall decals can be removed as well. Just slowly piece each piece away from the wall and discard.

FREQUENTLY ASKED WALL DECAL QUESTIONS

WHAT EXACTLY ARE WALL DECALS?

Wall decals—also known as wall stickers, wall graphics, wall appliques, and even wall clings are typically very thin sheets of vinyl with one printed side and one adhesive side. They stick flat to walls and other surfaces without the use of nails or glue.

WHAT MAKES ROOMMATES WALL DECALS SO SPECIAL?

Traditional wall stickers use a sticky backing that bonds to paint or smooth surfaces. When these wall stickers are removed, some of the backing is left behind in the form of a sticky residue—or you may even find that some of the paint comes off, too. Yikes!

RoomMates wall decals use a special adhesive that grips the wall tightly but won't form a bond. When the sticker is removed, it lifts easily from the wall without residue or damage. This technology also allows the decals to be used again at a new location without reducing the quality of their performance.

ARE ROOMMATES SAFE FOR KIDS?

Decorate with confidence knowing that RoomMates wall decals (and peel and stick wallpaper) is free of harmful chemicals like phthalates and lead, making it safe to use in your personal space. Please note for young children, keep product or decorations away from cribs to prevent choking hazard.

ARE THERE ANY FLAME RETARDANTS ADDED TO ROOMMATES PRODUCTS?

There are no flame resistance or flame retardants added to RoomMates products.

IS THERE LATEX IN THE DECALS? WE HAVE AN INDIVIDUAL WHO IS ALLERGIC TO LATEX.

Our wall decals do not contain latex. We too are very concerned with our products safety, which is why we're regularly undergoing new tests to ensure that each and every one of our products remain safe for children (and adults) to decorate with. Decorate with confidence knowing that RoomMates wall decals (and peel and stick wallpaper) is free of harmful chemicals like phthalates and lead, making it safe to use in your personal space. Our products are made of vinyl using a polymeric plasticizer not a phthalate. They are fully CPSIA-compliant, and have undergone many rigorous safety and regulatory tests.

CAN I CLEAN MY WALL DECALS?

A slightly damp cloth and a little hand soap should do the trick for removing any dirt, dust, or other substances that may end up on your wall decals.

We do **NOT** recommend spraying any chemicals on or around your RoomMates. Direct contact or prolonged exposure could cause bubbling, running, streaking, or fading.

CAN I USE COLORED MARKERS ON MY ROOMMATES DRY ERASE DECALS?

Most brands of dry erase markers can be used with RoomMates Dry Erase Decals. You may find that some brands leave behind more residue than others during the removal process. We recommend using flushable wet/baby wipes or alcohol-based wipes to remove any coloration left behind in these instances. For best results, we strongly recommend using the RoomMates Dry Erase Marker included in your packaging.

HOW DO I REMOVE MY WALL DECALS?

We take pride in the fact that our wall decals are removable! Removal is just as easy as application. To remove, start at a corner and slowly peel the decal from the wall or surface, moving toward the center of the wall decal until it is free from the wall. Pulling too hard, too fast may cause your wall decal to stretch.

HOW DO I STORE MY WALL DECALS IF I WANT TO SAVE THEM FOR LATER?

If there's a possibility that you'll need to remove your RoomMates, either to move them to a new location or to save them for re-use at a later date, we recommend saving the liners that come in the original packaging. You can re-apply the decals to the liners, roll them up, and store them wherever you please. In lieu of the original liners, wax or parchment paper also works very well for this purpose.
